

NATUREO FINANCE, exclusive advisor to Crédit Agricole Transitions & Energies (CATE) as it enters into the capital of the R3 Group.

ABOUT NATUREO FINANCE

Founded in 2008, NATUREO FINANCE is an independent advisory firm for mergers and acquisitions and fundraising, specialised in the energy and ecology transition sectors. NATUREO FINANCE's mission is to provide innovative technology companies with industrial, sectorial, and financial expertise to face the growth challenge in an international environment.

Natureo Finance advised Crédit Agricole Transitions & Energies, a subsidiary of the Crédit Agricole Group dedicated to supporting environmental transitions, in the context of its entry into the capital of R3, an expert in CSR solutions, decarbonization, and energy efficiency.

Crédit Agricole Transitions & Energies serves the societal project of the Crédit Agricole Group and its commitment to contribute to a low-carbon and sustainable economy by supporting and facilitating its clients' environmental transitions through two activities:

- The production and supply of decarbonised electricity in a short circuit, in collaboration with local stakeholders, through investment and financing offerings.
- Advisory services and transition solutions in support of clients' energy sobriety initiatives.

R3 develops and operates CSR (Corporate Social Responsibility), decarbonisation, and energy efficiency solutions to accelerate the transformation of companies, regardless of their size or sector. R3 relies on a team of experts, digital management platforms, and equipment financing solutions.

With this investment, Crédit Agricole Transitions & Energies is equipped to provide a range of solutions that will be operated by R3 for corporate and public sector clients.

On this occasion, Christophe Rouvière, President of NATUREO FINANCE, stated: *"We are very pleased to have supported CATE in this excellent transaction and to have contributed to the integration of R3's offerings within the Crédit Agricole Group"*.
